

Life is on

We are sensitive to the needs of everyone who depends on our knowledge, ideas and care. And by creatively challenging the limits of technology, we develop innovations that help people hear, understand and experience more of life's rich soundscapes.

Interact freely. Communicate with confidence.
Live without limit. Life is on.

Phonak ComPilot & TVLink S

Meet one satisfied CROS user ...

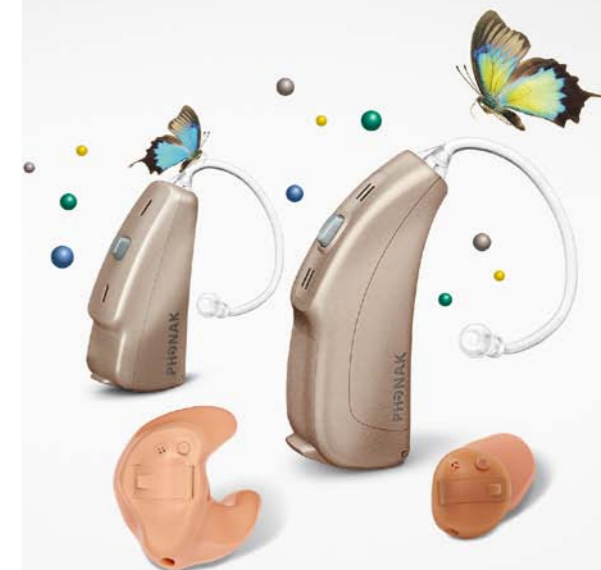

"My name is Don Gulock and I am 81 years old. As a result of an acoustic neuroma, I have a complete loss of hearing in one ear. I have suffered from one-sided hearing for 25 years. Then as I got older, I also developed a hearing loss in my other ear.

Recently, I was fitted with a Phonak CROS system. This has raised my hearing to a new level. Not only can I hear better, but it has none of the limitations I saw with the previous device. It's very comfortable and I wear it indoors and outside. It is also easy to connect to accessories like the ComPilot and TVLink S, which helps me to interact and communicate better. My Phonak CROS is wonderful and I, for one, am very grateful it has been developed." *Don Gulock*

Phonak CROS

Discover the best solution for one-sided hearing

Enjoy all round hearing delight

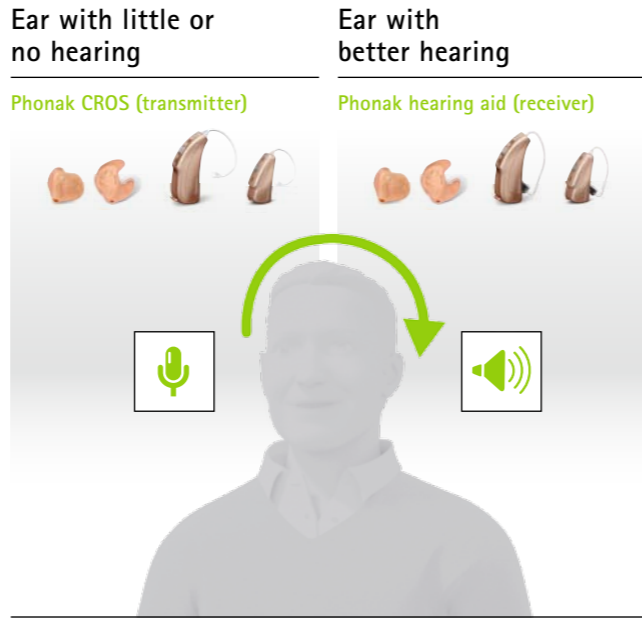

Phonak CROS is the solution of choice for people with hearing in only one ear

Life is there to be lived. But living it to the fullest can be a challenge, especially when you are missing many of its sounds due to one-sided hearing. However there is help at hand.

Phonak CROS enables you to catch the sounds from your non-hearing side – whether it is the voice of a friend or environmental sound.

This advanced wireless technology sends sound wirelessly from your non-hearing side (via a tiny CROS transmitter) to a discreet modern hearing aid (receiver) on your hearing ear. The result? You hear sounds from both sides in your good ear.

In short, it brings you all round hearing delight.

Choose the CROS that suits you

The Phonak CROS portfolio offers discreet and cosmetically appealing behind-the-ear and in-the-ear transmitters in a variety of styles, with different ear piece options and a wide range of attractive colors. CROS solutions are also compatible with a wide range of Phonak wireless hearing aids.

Choose your style

Phonak CROS – this small and stylish CROS solution virtually disappears behind the ear, making it the perfect option for people who favor full discretion.

Phonak CROS H2O – this water and dust resistant version gives you the freedom you need to enjoy all your favorite activities.

Phonak CROS 13 and CROS 312 – these two in-the-ear solutions offer the ultimate in discreet CROS technology.

Choose your color

Phonak CROS behind-the-ear styles are offered in an attractive color palette. With a variety of hair and skin tones, as well as fashion and fun colors, you're sure to find a Phonak CROS solution that suits your own unique style.
