## Why do you need Roger?

Today's hearing aid technology does an excellent job of improving speech understanding. However, 31% of hearing aid wearers report they still have challenges hearing in noisy situations.<sup>1</sup>

Roger technology is designed to boost the performance of hearing aids and cochlear implants, regardless of background noise or the distance to the person talking, by picking up the voice and transmitting it wirelessly to the listener.

### Adaptive to sound

If the noise level increases, Roger adapts accordingly, keeping the voice of the person talking above the background noise.

### Improved speech understanding in group conversations in noise<sup>2</sup>

MultiBeam Technology enables you to experience exceptional speech understanding in group conversations in noise.

### Access to multiple talkers

MultiTalker Network allows several Roger microphones to be used together, providing you with access to multiple talkers in any situation.

## Roger and your well-being

Growing evidence shows that treating hearing loss can positively impact your social-emotional, cognitive and physical well-being.<sup>3</sup>

Roger technology allows you to actively participate and socialize in more activities and meetings by giving you access to speech, in noise and over distance, so you can focus on work rather than on hearing.

# The versatility of Roger

## Small meetings

Place one microphone on the table to hear input from your manager and all of your colleagues.

## Large meetings

In larger meetings multiple Roger microphones will do an excellent job picking up all voices.

## Meetings with presenters

Use a wearable Roger microphone for the presenter along with table microphones to hear all participants.

## Workshop meetings

In stand-up meetings and workshops where people are moving around, use the pointing mode to focus in on the person talking.

## One-to-one

When in a noisy or crowded environment, hang a Roger microphone around your colleague's neck or clip it on their collar.

## Conference calls

With Roger technology, you can connect to your laptop, tablet or smartphone to participate and communicate in work meetings and conference calls.

# The right solution for you

Phonak has designed a range of Roger microphones so you can find a solution that's right for your specific needs at work.

## Roger On™

Experience the hearing performance with our latest microphone. With its ability to distinguish the direction of incoming speech and Pointing mode 2.0, users have the flexibility to focus on the conversations that truly matter. It can be placed on a table, held in the hand or worn by a presenter. Personal settings is easily handled with the myRogerMic app.

## Roger Table Mic II

Designed for meetings; multiple microphones can be connected in a MultiTalker Network to cover large meetings. It selects the person who's talking and switches automatically between the meeting participants.

## Roger Select™

Can be worn by a presenter or placed on a table. When multiple conversations take place, the listener can manually select whom to listen to.

## Receiver options

In hearing aids featuring RogerDirect™ the receiver can be installed directly. No need to add an external receiver. For other hearing aids and implants there are several types of receivers available.
